### Assessment of Cognitive Complaints Toolkit for Alzheimer’s Disease (ACCT-AD)

**Provider Wellness Visit/Screening Tool Flow Sheet**

#### PATIENT: Part 1

Questions for the patient. Provider completes each of the following three sections. All answers should be confirmed with informant if present for the visit. If no informant, confirm a negative screen with Mini-Cog©.

| Section   | Question                                                                 | Yes/No Options                                                                
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>I. Memory</td>
<td>Do you think your memory or thinking has changed in the last 5-10 years?</td>
<td>No → Proceed to language question. Yes → Could be cognitive impairment. Confirm with informant or Mini-Cog©. Proceed to language question.</td>
</tr>
<tr>
<td>II. Language</td>
<td>Have you noticed changes in your language?</td>
<td>No → Proceed to personality question. Yes → Could be cognitive impairment. Confirm with informant or Mini-Cog©. Proceed to personality question.</td>
</tr>
<tr>
<td>III. Personality</td>
<td>Have you noticed changes in your personality?</td>
<td>No → Proceed to language question. Yes → Could be cognitive impairment. Confirm with informant or Mini-Cog©. Proceed to personality question.</td>
</tr>
</tbody>
</table>

If all three responses are No, proceed to INFORMANT: Part 1. If no informant, proceed to Mini-Cog©; if Mini-Cog© normal, no further assessment. If score < 3, bring back patient for full ACCT-AD clinical assessment.

#### PATIENT: Part 2

Provider asks patient all three questions in memory, language, and personality sections. Make note of all No and Yes responses.

<table>
<thead>
<tr>
<th>Section</th>
<th>Question</th>
<th>Yes/No Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>I. Memory</td>
<td>Do you think your memory changes are worse than your peers?</td>
<td>No → Proceed to language question. Yes → Commented to you about these changes in your memory?</td>
</tr>
<tr>
<td>II. Language</td>
<td>Do you think your language changes are worse than your peers?</td>
<td>No → Proceed to personality question. Yes → Commented to you about these changes in your language?</td>
</tr>
<tr>
<td>III. Personality</td>
<td>Do you think your personality changes are worse than those of your peers?</td>
<td>No → Proceed to language question. Yes → Commented to you about these changes in your personality?</td>
</tr>
</tbody>
</table>

If any Yes responses to memory, language, or personality questions, proceed to follow-up questions in PATIENT: Part 2. (below)

If any Yes response, bring back patient for full ACCT-AD clinical assessment. If all responses from PATIENT: Part 2 are No, make note and continue to INFORMANT: Part 2. If no informant, proceed to Mini-Cog©; if Mini-Cog© normal, no further assessment. If score < 3, bring back patient for full ACCT-AD clinical assessment.
